

To WHOSOEVER IT MAYBE CONCERNED

Date: 31 October,2019

Respected Sir/Ma'am

Subject: Application for Job at your Organization.

I would like to apply for the position at your Organization. I learnt of your company through the Website. If possible I can start as internship for period of 6 months that is from 1-January 2020 till end of June, as I am an Undergrad Student. Also I can start the Job after graduating by end of June,2020. So either of the way is possible for me.

I'm currently majoring in Indus Institute of Technology, Ahmedabad and currently pursuing my 7th Semester. I have worked in Front End Development and have strong command over it but I would like to specialize as Full Stack Developer as I have keen interest in Backend technologies as well Hadoop. I feel that your firm places prominence in similar areas and having the privilege of serving as an employee at your firm will give me with the further exposure that I would need to advance my career.

I have also covered an Industry Orientation at RapidOps Solution Pvt Ltd for a period of 30 days that made me understand the working of web designing that eventually leads to frontend and then backend integration. I would like to extend my future in that area as well as other technologies like Android, hibernate, big data, machine learning so that I can built and gain knowledge to understand the organization frame and functionality. I have a hand over various hardware and software skills.

Thank you to go through my cover letter. I have attached my resume as well as internship brief along with this mail. You can reach me by phone at +919428431023 or by mail at karshilsheth@gmail.com .

Yours faithfully

Karshil Sheth
