Respected Sir/Ma'am,

Everyone tells me the entry-level Software Developer position in any of the firms is going to be the same. However, after speaking with over 20 professionals, it has become clear to me that your Organization stands out from the rest.

So this is letter is to express my interest in your posting on your website in careers section, for the role of Software Engineer or whichever matches with my skill set. With a Bachelor's degree in Computer Science Engineering, and hands-on experience using Java Frameworks to create and implement software applications, I am confident I will be an asset to your organization. I am positive I can solve and help my team to grow for upcoming challenges.

Having spent the past 1.5 years at software consulting firms, I have not only developed robust problem-solving skills, but also a fair skill for project management. I have helped my seniors in completion of the POC tasks and create small tools for their day to day usage.

In my latest role, I was involved in the full life-cycle of an API management project which had 1000+ API calls every minute during business hours and handle the API traffic between 100+ systems in about 1000 environments.

Thank you for your time and consideration. My work experiences, coupled with my affinity for project management, would make me an asset to your organization. I very much look forward to the opportunity to speak with you in person about my interest in this position. I can be easily reached at your convenience by email (karshilsheth@gmail.com) or by cell phone (+919428431023).

Sincerely,

Karshil Sheth
